

Measurable Elements of MPE.02.02

1. All medical students and trainees are provided an orientation that includes at least the following:
 - Hospital quality and patient safety program
 - Infection prevention and control program
 - Medication safety program
 - International Patient Safety Goals
 - Other required hospital orientation, including at the department and unit level
 - Ongoing required education
2. Medical students and trainees are included in the data collection for the hospital's quality monitoring programs.
3. Those supervising medical students and trainees ensure that the medical students and trainees are knowledgeable of the programs and participate in the programs.
4. Medical students and trainees can demonstrate knowledge of these programs.
5. Those supervising medical students and trainees consider compliance with these programs in their evaluation of medical student and trainee performance.

Standard MPE.02.03

Medical trainees who provide care or services within the hospital—outside of the parameters of their academic program—are granted permission to provide those services.

Intent of MPE.02.03

The laws and regulations in many countries permit trainees, as they advance in their program, to provide services to the hospital outside of their academic program. For example, a trainee may provide medical care in the hospital's emergency department in evenings or on weekends or may function as the "house doctor" during the night shift. If a medical trainee is granted permission to provide services outside of their academic program, the individual trainee must be evaluated and given permission to provide those services through the normal established processes for such professionals as described in the Staff Qualifications and Education (SQE) standards. Any approved services provided by a medical trainee outside their academic programs are then evaluated as required by the SQE standards.

Measurable Elements of MPE.02.03

1. The hospital determines what types of trainees and under which circumstances trainees can be hired or otherwise engaged by the hospital to provide patient care or other services.
2. Trainees providing such services are granted permission through credentialing and privileging, a job description, or other relevant processes for the services being provided.
3. Trainees providing such services are evaluated for the services being provided.
