

Standards Development Committee/ Advisory Committees and Experts Panel

Experts including physicians, nurses, pharmacists, laboratory specialists, infection control practitioners, biomedical engineers, administrators and public policy makers representing all health sectors in Saudi Arabia have actively guided the development of this third edition of the National Hospital Standards. Several professional bodies have assisted as well with the development and refinement of the standards. CBAHI would like to extend thanks and appreciation to all health authorities, organizations and individuals who participated in or provided external commentaries to this important national initiative.
