

Primary Source Verification (PSV)

1. The SCHS applies PSV for the following components only:
 - education qualification.
 - Last one year of experience.

The SCHS is currently addressing overseas applicants through the Mumaris system, which allows applicants to begin their registration and PSV processes from their home countries before arriving to KSA.

Primary Source Verification (PSV)

- Currently, universities under the Ministry of Higher Education do not mandate SCHS registration for promotions, therefore the rule is faculty staff do not acquire the SCHS license unless required by the private hospital they practice within.
- Implementing PSV globally across the board for all applicants through a unified process of verification for all types of healthcare professionals will result in a healthier and more competent workforce.
- The addition of components to the verification process such as increasing the number of years' experience, health license, logbook and Certificates of Good Standing will ensure the standard of expertise.
