

The mission of the Saudi Central Board for Accreditation of Healthcare Institutions (CBAHI) is to continuously improve the safety and quality of healthcare services in the Kingdom of Saudi Arabia by supporting the healthcare facilities to continuously comply with the accreditation standards. CBAHI does this through the provision of preparation, on-site assessment, monitoring, education, publications and consultation services.

CBAHI is making every possible effort to separate its consultative and educational programs as well as all publications it produces from its accreditation activities. This manual is produced for the sole use of the individual healthcare facilities and healthcare professionals in Saudi Arabia. CBAHI provides supplementary educational sessions to explain the intent of this manual and its contents, and therefore, attendance at these activities is helpful in achieving compliance with the quality and safety standards followed by accreditation. Attendees at CBAHI training, orientation and educational programs and purchasers of its publications will not have a distinctive treatment by any CBAHI associates including CBAHI surveyors, nor receive any privilege regarding assessment scoring results or outcome.
