

**HSC.21350 Clinical Transplant Registries and Transplant Data Retention****Phase II**

**The institution participates in and retains records of patient and donor transplant information in the United Network for Organ Sharing (UNOS) Clinical Transplant Registry or its equivalent.**

*NOTE: The laboratory and/or transplant coordinator must retain records on transplant recipients, including a history of prior transfusion, pregnancy, and prior transplants as well as HLA antibody history, date of transplant(s) and outcome. In addition, there must be records of donor and recipient age, race, sex, ABO, and HLA types. The source of the donor organ or donor hematopoietic stem cells must be recorded. This information can be retained as part of an institutional registry.*

**HSC.21366 Record Review****Phase II**

**There are records of periodic review and verification of patient histocompatibility data.**

*NOTE: Histocompatibility tests performed for organ transplantation (HLA typing, HLA antibody sensitization, unacceptable antigens during prior transplants or sensitization, and any pretransplant screening results) must be reviewed and verified when patients are placed on organ waiting lists. Changes or additions to the waiting lists must be verified. These records must be readily available for review and retained for at least two years.*

**\*\*REVISED\*\* 12/26/2024****HSC.21382 Discrepancy Resolution****Phase II**

**The laboratory has a defined process to resolve HLA typing discrepancies within and between laboratories.**

*NOTE: There must be records of the steps taken to resolve discrepancies.*

*This requirement applies to HLA testing performed by all testing methods, including next generation sequencing.*

**HSC.21390 Donor Confidentiality****Phase II**

**The laboratory ensures confidentiality of all donor records, including releasing or sharing donor information for clinical purposes.**

*NOTE: For example, if identifiable donor information will be shared with the recipient, appropriate donor informed consent must be obtained, donor information must be redacted, or other appropriate action taken.*

*Refer to the Laboratory General Checklist for specific requirements on patient privacy and patient data accessibility.*
