

## Service Improvement Programme Overview and Outcomes Targets

The organization must describe the strategy for capturing patient outcomes data, mobilizing that data to track progress towards health goals, and enable patients to report outcomes and progress towards their personal health and wellness goals.

ID	Stage	Y	N	Compliance Statement
252	7			<p><b>Tools track &amp; trace care processes + products linked to outcomes</b>            Digital tools and infrastructure track and trace care processes, and products used in care, linked to individual outcomes and progress toward patient health and wellness goals, for all inpatient care settings.</p>
253	7			<p><b>Digital tools &amp; tech is evaluated for ease of use and rates of use</b>            Organization evaluates digital tools and technologies (e.g., wearables, devices, applications) for ease of use for patients, and rates of utilization.</p>
254	7			<p><b>Tracking patient outcomes informs decisions to personalize care</b>            Tracking patient outcomes informs decisions to personalize care delivery to strengthen patient's progress towards health goals and desired outcomes.</p>
