### **MM.36 The hospital has a safe system for drug administration.**

- MM.36.1 The hospital defines nurses and other clinical staff authorized to administer medications with or without supervision.
  - MM.36.2 Qualifications, experiences, and competency assessments of individuals involved in drug administration are available in their personnel files.
  - MM.36.3 The hospital guidelines for safe administration of intravenous push medications are available, disseminated and implemented in all patient care units. The guidelines include medication name, infusion time, nurse qualification and patient care unit.
  - MM.36.4 The hospital has approved, disseminated, and implemented guidelines on standard drug administration time.
  - MM.36.5 The hospital maintains accurate records of the disposal of the unused portion of narcotic drugs and controlled substances.
  - MM.36.6 The hospital maintains updated and accurate records of drug administration.
  - MM.36.7 Independent double check of all high alert medications is performed.
  - MM.36.8 The hospital adopts safe administration and disposal of chemotherapy.
- 

#### **Standard Intent:**

Nurses often serve as the final point in the checks-and-balances triad (physicians and other prescribers, pharmacists, and nurses) for the medication use process. Nurses who practice in hospital settings should be familiar with standard medication administration times. Standard drug administration times should be established for the hospital by the P&T committee (or its equivalent). All doses should be administered at scheduled times unless there are questions or problems to be resolved. Medication doses should not be removed from packaging or labeling until immediately before administration. The administration of medication should be documented (in the medication administration record, MAR) as soon as it is completed. Only authorized nurses with the appropriate qualification, experience, and competencies are allowed to administer medications. Special skills and competencies for nursing staff are required for administration of IV push medications, narcotics and controlled medications, chemotherapy and other high alert medications.

---

### **MM.37 The hospital has a system to review and verify medications before administration.**

- MM.37.1 The hospital implements a multidisciplinary policy and procedure on proper verification of dispensed medications before administration (right patient, right medicine, right dose, right frequency, right route, and right time).
- MM.37.2 Medications are verified against the medication administration record (MAR) before administration.
