

## **Re-credentialing requirements:**

Must include all that is required in the Credentialing requirements (if newly granted).

Ongoing Monitoring and Interventions must be included for re-credentialing:

- Credentialing Office continuously monitors practitioners between re-credentialing and privileging cycles and takes appropriate action when it identifies occurrences of poor quality of member care and service. Practitioners with an expired clinical license to practice are terminated or suspended.
- Re-credentialing is conducted at least every 24 months in accordance with the credentialing and re-credentialing process.
- The re-credentialing process is conducted with the same standards as those for initial credentialing.
- The decision concerning re-appointment or failure to re-appoint will be conveyed to the physician/provider in writing.
